

## EDGE: the signature case

Do you wish to present your products in a distinctive way? With the EDGE you really stand out. Whatever you want to present. You present your products professionally and distinctively in an EDGE. The curved aluminium profile is unique and provides the exclusive look. Would you like the aluminium profile in a specific RAL colour and the panels in the colour of corporate identity with your logo on them? That is possible! Or how about an exclusive wood veneer top layer in combination with aluminium profiles that have the appearance of robust bright steel? Or a fully gold-coloured case? With the EDGE you have something unique in your possession!

With the EDGE we have one of the most exclusive custom-made case ever on the market. The EDGE is our signature case. In the base, your products are perfectly located in a foam interior and in the lid, perhaps, a full-colour scene or even a video module. A video module that starts playing the moment you open the case at the customer's premises. In this way, your product presentation is supported visually, and the unique selling points of your products are brought to your clients attention.

# EDGE

## Gefken

Gefken provides solutions that perfectly suit your way of working. Solution-focused customisation. A starting point that hasn't changed since 1959. Perhaps the reason why Gefken, with its own factory in the Netherlands, has grown into the European specialist in the field of custom-made cases and flight cases. Our extensive range of aluminium profile cases and custom-made flightcases, from Gefken Basic to G2 Flightcases, offers solutions for every sector and application. All our products make work easier and more efficient.

### **From custom-made cases and flightcases to engineered specials**

With our own team of engineers, industrial product designers, experts in the field of aluminium profiles and construction possibilities, and our factory with modern machinery, we are able to think beyond cases and flightcases.

Have a conversation with the makers and discover that the best solutions are more surprising than you think. Interested? Make an appointment with Gefken.
